-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/2/04 has been entered.

***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 13-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

As previously disclosed and presented, the sampling of the te signal is during particular time periods, as described with respect to figure 1. As noted and described, there is a hold period as well, hence the amendments introducing the phrase/concept of.. "continuously calculated amount" is interpreted by the examiner as contrary to the disclosure as originally filed. Again, the te signal is intermittently provided/calculated for because there is a time period in which no calculation is performed, rather a calculated value is HELD.

Because all the claims recite such concept/phraseology they are all rejected accordingly.

***Conclusion***

***Response to Arguments***

4. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Art Unit: 2653

***Allowable Subject Matter***

5. The claims are objected to as containing drawn to the above noted 112 problems.

If applicants' could properly obviate/overcome such a rejection, then the apparatus claims as presented would be allowable over the art of record. Nevertheless, the examiner cannot distinguish between the independent apparatus claims – note the prohibition against duplicate allowed claims in MPEP §

With respect to the method claims presented, if appropriate distinguishing steps following/analogous to that presented in the apparatus claims could be properly included, and the above noted 112 problems corrected for, they would also be considered allowable over the art of record.
